

## **WILCON COMPLETES MAJOR NEW FIBER OPTIC NETWORK BUILD FOR LOS ANGELES CENTER STUDIOS**

*State-of-the-art network infrastructure solution  
to serve growing base of media and entertainment tenants*

LOS ANGELES, CA (Jan. 8, 2014) — Wilcon has completed a major new fiber optic network build to Los Angeles Center Studios, LA’s premier independent movie studio.

This ultra-broadband network infrastructure can deliver high-capacity data services and scalable bandwidth for Los Angeles Center Studios’ growing base of media and entertainment tenants.

Wilcon is the best-in-class fiber optic network service provider, and its extensive, diverse Southern California reach enables secure connectivity for mission critical traffic to production/postproduction houses, video distribution points, broadcast centers and telecommunications hubs critical to the media and entertainment industry.

Jon DeLuca, CEO of Wilcon, says, “We can deliver a comprehensive dark fiber solution and a full suite of lit services, up to 10 gig circuits, to provide transport capabilities from Los Angeles Center Studios to all major locations throughout Southern California.”

“Wilcon was a very natural fit for us,” says Sam Nicassio, President, Los Angeles Center Studios. “They offer superior scalability, reliability and customized support, and their fiber network capabilities will enable us to further grow our suite of services to the media and entertainment industry.”

### **About Wilcon**

Founded in 1998, Wilcon is the premier West coast provider of best-in-class fiber optic network and data center infrastructure.

As one of the largest fiber optic networks in Southern California, Wilcon offers vast reach and diverse routes connecting major data centers, enterprise locations and wireless communications sites, as well as the most dense fiber and interconnection infrastructure in downtown Los Angeles.

Wilcon delivers dark fiber and ultra-broadband optical services for businesses, wireless carriers and other communications service providers that ensure optimal performance for their mission-critical data traffic and applications.

Wilcon also owns and operates leading data center and carrier-neutral colocation facilities in downtown Los Angeles, including its key hub at the One Wilshire Building.
