#### **BUNDLED SPACE, POWER AND INTERNET CONNECTIVITY IN JUST 10 BUSINESS DAYS**

Carriers, service providers and cloud startups: need to quickly establish network infrastructure on the West Coast and fast-track your U.S. presence? Wilcon's Rapid Connect service allows global organizations a scalable way to jumpstart their operations in the States.

**Seamless. Cost-effective. Fast.**

Establish a U.S. fiber footprint in as few as ten business days with Rapid Connect. But it's not just a quick network turn-up; it's a state-of-the-art one, too. Rapid Connect allows organizations to:

- Scale with flexible space (½ cabinet, full rack, custom-sized cages) and power
- Connect to multiple private and geographically diverse Tier-1 Internet connections that ensure reliable access to the Internet from 10MBps to 100G
- Leverage Wilcon's three data centers strategically located in downtown LA at 624 South Grand Avenue (One Wilshire Building), 530 West 6th St. and 609 West 7th St. - SSAE 16 and HIPAA Certified
- Directly connect to AWS and other cloud service providers
- Rely on Wilcon's award-winning, on-site technical support team, remote hands options and carrier-grade proactive monitoring
- Leverage Wilcon's state-of-the-art colocation, power and reliable Internet service — all bundled into flexible packages

## RAPID CONNECT

### Jumpstart Your U.S. Operations with Quick Network Turn-up

“YOUR ACCESS TO THE PREMIER DARK FIBER NETWORK IN SOUTHERN CALIFORNIA.”

#### LA AS A GATEWAY TO THE U.S.

- With access to over 300 global networks and secure cloud infrastructure on-ramps, Wilcon’s downtown LA data centers are connected over its fiber network to every major data center and interconnection facility in Southern California.
- Wilcon customers also have access to over 500 on-net enterprise buildings and more than 300 near-net buildings, along with content distribution hubs and media and broadcast distribution centers.
- About one-third of all Internet traffic from the U.S. to Asia passes through One Wilshire, Wilcon’s key colocation hub.

Discover how Wilcon can jumpstart your U.S. operations.

#### About Wilcon

Founded in 1998, Wilcon is the premier West coast provider of best-in-class fiber optic network and data center infrastructure. As one of the largest fiber optic networks in Southern California, Wilcon offers vast reach and diverse routes connecting major data centers, enterprise locations and wireless communications sites, as well as the most dense fiber and interconnection infrastructure in downtown Los Angeles. Wilcon delivers dark fiber and ultra-broadband optical services for businesses, wireless carriers and other communications service providers that ensure optimal performance for their mission-critical data traffic and applications. Wilcon also owns and operates leading data center and carrier-neutral colocation facilities in downtown Los Angeles, including its key hub at the One Wilshire Building.
